LogicMonitor

PRODUCT BRIEF

Private-Instructor-Led Training

Product overview summary

LogicMonitor's Private Instructor-Led Training is a new offering for enterprises looking to offer live onsite or virtual training for team members. LogicMonitor Training Engineers will work with each customer to scope their unique training needs and deliver the training they need at the time they need it.

Key benefits

Cost Savings

Private Instructor-Led Training eliminates travel expenses and reduces time away from the office. Cost per student is typically at least 25% less than the cost of individual registrations

Dedicated LogicMonitor Expert

A LogicMonitor Training Engineer is dedicated to your team and presents training based on your needs and business objectives

Tailored Delivery

A LogicMonitor Training Engineer will work with you to deliver specific course content that supports your business requirements

Tailored delivery is beneficial for teams with limited time

LogicMonitor Private Instructor-Led Training is the perfect option for organizations that need a cost-effective way to scale employee training. Each Private Instructor-Led Training is tailored to an organization's specific needs with:

- Dedicated Training engineers deliver to personalized training for each teams unique needs and based on their business objectives

- Prescriptive content designed by the Customer Education team that helps maximize product knowledge

- Trainings based on participants schedule and availability that are both time and cost-efficient
